Custom Plastic Packaging Solutions

TOMRIC
systems, inc.

At Tomric, our goal is to deliver to you creative and cost effective solutions for your packaging needs while keeping a focus on your bottom line. Tomric has extensive experience in the confectionery, bakery, biscuit and cracker segments and we look forward to helping you develop a custom solution for your toughest challenges.

STRATEGIC BENEFITS

- **Prototype Development** – from CAD drawings to live samples, our team of designers give shape to your ideas.
- **Material Specification** – our wide-ranging experience with food and other related industries insures that you get the right material for the job. We work with you to make sure that all stakeholders needs are heard... from your production line to your consumer's needs for recyclability. Let us work with you to develop cost effective solutions that keep you competitive!
- **Tooling Development** – our tooling development team is responsible for moving your concepts from the design phase to reality. Combining craftsmanship with machining technology yields finished products that meet your requirements for structural integrity and efficiency.
- **Production Expertise** – by using the latest forming technology and innovations, we insure product quality part-to-part and year-to-year.
- **Little Things That Mean A Lot** – need to integrate your packaging with automatic filling lines? No problem... we can design the tray to meet your machines needs. Have a specific packing requirement for your special project? No problem... we can sleeve, bag, case, master case or bulk pack to your specification.
